CEO Statement

Ventura was founded under the belief that as simple and easy as it is to say, "doing the right thing always comes first" we must ensure that everything we do is honest and takes care of our most valuable assets, **customers, communities**, and the **environment**.

When my late husband, Michael, started this company in 1996, he believed this loyalty and obligation would allow us to be trusted by our customers and our partners, distinguishing us in this very competitive industry and guiding Ventura's success. It is a distinction that I now must uphold to earn your trust. Our partners are valuable to the organization and me, and as we all look ahead, post-pandemic, we must trust Michael's beliefs and work hard because we can accomplish great things together.

“

***Our partners are valuable to
the organization and me.***

- Carol “Kaye” Sierra
Chief Executive Officer
